Sparsh Choudhary

Lead Simulation Consultant at SimWell | IIT(ISM) Dhanbad
Indore, Madhya Pradesh, India

Summary

Over 5+ years of professional experience in developing products, solutions specifically related to Supply Chain Management for business processes to improve Operations Excellence. Entrepreneurial mindset with more than 3 years of experience of start-up building from scratch to grow into a successful business. Proven people leader with experience in successfully leading team of 10+ member. Skilled in Product Management with prior experience of working in start-ups. Strong professional with a Bachelor of Technology & Master's in Technology degree focused in Computer Science & Engineering from Indian Institute of Technology (Indian School of Mines), Dhanbad.

Experience

SimWell Consulting & Technologies Inc.

4 years 7 months

Simulation Consultant | Lead Modeler

March 2025 - Present (1 year 3 months)

Indore, Madhya Pradesh, India

Simulation Consultant | Senior Modeler

January 2023 - March 2025 (2 years 3 months)

Bengaluru, Karnataka, India

Simulation Consultant | Modeler

November 2021 - January 2023 (1 year 3 months)

Bengaluru, Karnataka, India

ITC Infotech

Business Analyst

December 2019 - November 2021 (2 years)

Bengaluru Area, India

- Building Scalable Simulation & Analytical solutions related to Supply Chain Management for businesses to improve

Operations Excellence.

- Area of expertise include Supply Chain Simulation, Optimization & Artificial Intelligence. Worked extensively on Anylogic to build scalable Simulation solutions to help optimize & improve the operations.
- Developed Digital Twin of Supply Chain Network for one of the major Pharmaceutical Company. The solution helped in deciding the best production policy & replenishment policy by choosing various parameters configuration using optimization. The solution helped in supporting better decision making for an agile supply chain. Moreover, it helped in saving 250k € per year in distribution costs. A complete tool like functionality was developed using Anylogic, Python, Excel & Tableau for visualization of KPIs.
- Developed Digital Twin of a steel converter facility for crane scheduling in Anylogic for one of the major Steel producers in the world. The solution helped in deciding the best Sequence of crane movements using optimization. Optimal crane movement was determined under various parameters configuration & situations to help improve the efficiency of the steel converter facility
- Developed Warehouse Simulation model on Anylogic for one of the leading Indian eCommerce startup. The solution helped in deciding warehouse operations strategy by trying out different layout configurations & deciding on various parameters of warehouse operation using optimization within the simulation.
- Worked on creating Supply Chain Tower for Supply Chain Network among Manufacturers, Suppliers, Distribution Centers, and Retailers to watch on Network performance considering different disrupting events happening in and around the locations.

DHL SmarTrucking

Management Trainee (Planning, Operations)

December 2018 - December 2019 (1 year 1 month)

Mumbai, Maharashtra, India

- Streamlines daily business operations to find ways to cut costs, maximize sales and increase profits.

- Managed Complex Transportation Network of the company which owns 745 trucks running across 12 locations in the country.
- Improved Turnaround Time of vehicles from 70 hours to 52 hours using data-driven approach.
- Developed traffic models using Mathematical Techniques and Specialist Computer Applications Telematics to handle peak season plan of Major e-Commerce Clients & 3PL Clients serving more than 100 placements in a day.
- Developed the Predictive Model to take future orders using data-driven approach increasing the sales by 20%.
- Handled Project Management for Planning & Execution Tool of SAP TM to improve its function based on user & business needs, thereby reducing the planning time by 75%.

Saddacampus

Co-Founder & Director

March 2015 - December 2018 (3 years 10 months)

Dhanbad Area, India

Saddacampus was a start-up providing services like food delivery, laundry, etc. especially to college students.

- Online platform providing services- food delivery, laundry to 6 colleges across the country.
- Incubated during the period 2016-18 under CIIE IIT(ISM), Dhanbad & awarded seed-fund through TEQIP.
- Lead conceptualization, design and development of the product
 - o Performed Market & User Research among 5000 students to find & analyze the demand for services for college students.
 - o Designed the product sketches as well as back-end architecture of the product, and managed the development of the UI & UX.
 - o Conducted more than 100 user interviews to gather feedback and iterate product features.
- Lead product marketing, growth and user acquisition
 - o Grew the platform to more than 2000 signups and more than 1200 active users 6 months post public launch.
 - o Expanded Business Operations to 6 colleges across the country.

Transport Bazaar

Business Development Intern

May 2016 - July 2016 (3 months)

Indore

1. Created trucker network across Geography.
2. Built SME(Small & Medium Enterprise) network.
3. Interacted with different partners to resolve their problems.
4. Managed the Customer Relationship Management Software.
5. Executed the Business Operations.
